Office Action Summary	Application No. 10/736,118	Applicant(s) SWANN, RAYMOND C.	
	Examiner Phi D. A	Art Unit 3637	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Cooper et al (4670071).

Cooper discloses a base sheet assembly consisting essentially of a waterproof self-adhering base sheet (1, figure 2), a bottom surface release sheet (3) forming a bottom surface of the base sheet assembly, a top surface release sheet (col 3 lines 10-17) forming a top surface of the base sheet assembly, the waterproof base sheet having a length, a width and a thickness, the sheet having a bottom major surface and a top major surface defined by the length and the width of the base sheet, the base sheet consisting essentially of a reinforcing layer (5) encapsulated within a self-adhering bitumen (1) that forms the major top and bottom surface of the base sheet, the bottom release overlying and being substantially coextensive with the bottom major surface of the base sheet to protect the bottom major surface of the base sheet from damage during storage, shipment and handling and being removable from the bottom major surface of the base sheet immediately prior to installation of the base sheet (inherently capable of functioning as claimed), the bottom surface of the base sheet being self-adhering when the bottom release sheet is removed, the top surface release sheet overlying and being substantially coextensive with the top major surface of the base sheet to protect the top major surface of the base sheet from damage during storage, shipment, and handling and being removable from the top major surface

Art Unit: 3637

of the base sheet immediately prior to an application of an overlying roof layer to the major surface of the base sheet (inherently capable of functioning as claimed), the top major surface of the base sheet being self-adhering when the top release sheet is removed.

Response to Arguments

3. Applicant's arguments with respect to claim 1 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

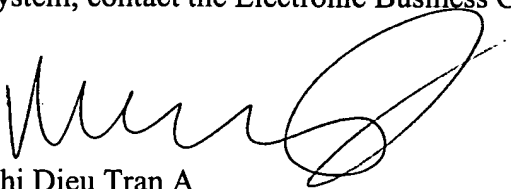

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art shows a roofing base sheet assembly.
